# Financial Performance

## Performance Commentary:

- Net operational revenue (excl. other income) for the quarter de-grew 16.2% YoY and 17.2% QoQ while FY20 remained flat YoY. The weakness was primarily attributable to:
  - Weakness in growth for the quarter is attributable to the novel Coronavirus
  - Weakness in overall growth for the year was on the back of a general slowdown internationally as well as domestically
- Contribution margin improved 200 bps from 43.6% in FY19 to 46.1% in FY20.
- EBITDA margins remained stable for FY20 at 17.2% despite various challenges in the industry and country.
- During the quarter, Stylam completed the sale of its non-core real estate asset for INR 34 crores and used the proceeds to pair down debt accordingly. The total debt as on 31<sup>st</sup> March 2020 stands at INR 118 crores with a cash balance of INR 6 crores.
- The net worth of the company as on 31<sup>st</sup> March 2020 stands at INR 204 crore resulting in a net debt to equity ratio of 0.6x.

# Impact of Covid-19

The outbreak of unprecedented COVID-19 pandemic has worsened the overall economic conditions and caused a significant disturbance and slowdown of economic activities globally.

The nationwide lockdown ordered by the Government of India also resulted in significant reduction in economic activities throughout the nation and therefore a discernible adverse effect of the same was witnessed on the business operations (in terms of production as well as sales) of the Company.

The moratorium offered by banks (as per RBI directive) due to nationwide lockdown was not availed by the Company

Stylam's liquidity position remains steady despite discontinuation in operations on account of the lockdown. The business seems to be witnessing a steady revival now.

In order to combat the prejudicial impact of Covid-19, our focus mainly revolves around reviving and boosting sales while simultaneously taking cost effective measures. The result of these efforts would be witnessed in the near future.
